# Look At That Building!: A First Book Of Structures

## Synopsis

Learning about buildings and how they are constructed has never been so much fun. This gem of a book introduces young readers to basic construction concepts through the eyes of five friends keen on building a doghouse for their pet pooch, Max. To find out more about the task, Yulee, Martin, Nick, Sally and Pedro head to the library, where they learn about foundations, beams, frames and other building fundamentals. Fun facts, bright illustrations and comic-book-style discussions among the characters add to the mix. An activity at the end of the book invites readers to make their own mini doghouse out of marshmallows, paper, glue and craft sticks.

## Customer Reviews

Although the text of the book is written for very young readers, the book covers fundamental topics of buildings in a visual way that even older readers will learn from. From foundations to roofing, this book explores how a building is constructed -- then has a practice building for kids to create themselves.

This is one of the book we bought him and it is for Easter. I'm sure he will love it. He is s4.Maureen
