Kids' Crafts: Crochet: Fantastic Jewelry, Hats, Purses, Pillows & More

Synopsis

From colorful shoelaces to shimmering amulet bags, these 50 crocheted creations will enchant kids and take them from the very beginning to a more experienced level. Even children who have never picked up a pair of needles will master the fundamentals quickly, thanks to the many detailed directions and instructive, attractive color photos. The fun begins as they try their hand at the basic chain stitch, and then learn to crochet around a ring to make a key chain. Small, accessible projects follow, including a yellow purse with a glass button accent and comfy wool slippers. As kids's™ skills increase, they can move on to clothes, toys, backpacks, and more.

Book Information

Lexile Measure: 1140L (What's this?)

Series: Kids' Crafts

Age Range: 8 and up

Grade Level: 3 and up

Customer Reviews

My daughter has made several items from this book. It has easy to follow instructions. The first projects do not use abbreviations so a person can learn the stitches without having to figure out the abbreviations at the same time.

This is a fun book that my 12 yr old enjoys. Cute ideas for projects for the beginning crocheter. She was thrilled with the book.

This was the first crochet book I got at the library when I started crocheting. Although the "Introduction" and "Getting Started" sections are pretty good, the actual pattern instructions are very bad. Out of thirty projects the instructions were only clear enough to do one of them, and even then I didn't even do the really complicated extra part at the end. I do like the part at the beginning where they talk about yarn and hooks. And the instructions for the different stitches are pretty good. I wouldn't buy this book - I'd just get it at the library, read the "Introduction" and "Getting Started" sections and don't even waste your time trying the projects. Hope this helps!(For a crochet book with cute and fun and easy projects, try Crocheting (Kids Can Do It)

A bit outdated, but in great condition, with very well-written and well-illustrated instructions. Thanks!
