These aren't really art mysteries. What did Jesus look like? Where is the Ark of the Covenant? Who invented oil painting? What about Van Gogh's ear? Was Caravaggio assassinated? The concept for this book is contrived -- these aren't interesting mysteries. And then we get such paltry glimpses of the artwork in question, little photographs instead of two-page spreads, that the book does not even make for a good art book. Why? That is the real mystery. *****p.s. Y-O-L-K. Not

y-o-k-e. When it comes from an egg, it's a yolk. Page 45.

While this book is very interesting and piques the curiosity of the reader, I question the information regarding Goya's The Family of Charles IV. The author attributes the missing face of the female figure to the deceased daughter of Charles, Maria Amalia. Many art historians attribute the missing facial features to the fact that the figure actually represented the future not-yet-chosen wife of Prince Ferdinand.

I thought there were too many outdated and religious references. I thought there would be more intriguing art that children would enjoy.

My students love to read when they finish a project early and this is a great series of books for them to learn about art.

This is a book that I thought the library should have. I found it interesting to read and would recommend it to anyone

Fantastic book! It has made me want to order ALL of them in this series.

My son loves it, also every adult who visits:)

Cant go wrong with a great book
