Customer Reviews

My 2 year-old daughter loves this book. The dinos all have different textures for your child to feel, and she can take them out of the book and carry them around with her. Very durable and lots of fun.

My son loves all four books in this series. He got his first one at 10 months and is now 20 months and wants to read them all the time. He loves the different textures and is now starting to put the shapes back in the spaces by himself. I recommend all the textured soft shape books very highly.

My kids are 2 and they really like it. I bought it to cut up and use as wall decor for my son's dinosaur

room. Now I need another one, because they want to play with it!

Great book, love the shapes and textures, however the book falls apart and you are left with separate pages. Not well put together.

This book has been wonderful for my son. He loves it. He's 10 months old and enjoys eating it up!
