Why I Sneeze, Shiver, Hiccup, & Yawn (Let's-Read-and-Find-Out Science 2)

Synopsis

Ka-choo! Brrr. Yawnnnnn. Have you ever wondered what makes you sneeze when you're in a dusty room? Or shiver when you get out of the bathtub? Or yawn when you're tired? All of these actions are reflexes. Your body makes them happen even though you don't tell it to. Budding young scientists will be amazed as Melvin Berger and Paul Meisel reveal the mysteries behind the reflexes that happen in our bodies every day and offer fun-filled experiments to try on family and friends. Let's Read and Find Out Science, Stage 2.

Book Information

Lexile Measure: 480L (What's this?)

Series: Let's-Read-and-Find-Out Science 2

Paperback: 40 pages

Publisher: HarperCollins; Let's-Read-and-Find-Out Science 2 edition (January 5, 2000)

Language: English

ISBN-10: 0064451933

ISBN-13: 978-0064451932

Product Dimensions: 9.8 x 0.1 x 8 inches

Shipping Weight: 5.6 ounces (View shipping rates and policies)

Average Customer Review: 4.4 out of 5 stars [See all reviews](#) (18 customer reviews)

Best Sellers Rank: #83,874 in Books (See Top 100 in Books) [#37 in Books > Children's Books > Activities, Crafts & Games > Games > Questions & Answers](#) [#80 in Books > Children's Books > Education & Reference > Science Studies > Anatomy & Physiology](#) [#270 in Books > Medical Books > Basic Sciences > Physiology](#)

Age Range: 4 - 8 years

Grade Level: Kindergarten - 4

Customer Reviews

This book explains about how the human body deals with reflexes. It gets a little technical, but a four or five year old can definitely understand the content. I enjoyed reading this book to my children because even I learned a little that I either had not learned or had forgotten.

We read this book with our 3 year old and our 7 year old. They both like it. Neither is overly interested in science but this book does a good job relating to children, educating and yet keeping it interesting. They like to shout out "reflex" anytime someone has a reflex (sneeze, yawn, etc.) for a

couple of days after reading the book. Well worth it and fun for parents too.

To explain things at a child's level is very important. I have no complaints about this book. Parents of pre-schoolers and schoolers should give this a try, it's worth it! Educational: grammar, science, facts etc.

My 6 yr old son prefers nonfiction books and it can be tough to find them on his level. He loves all the books from this series.

There are a lot of these little books and they all are very well done. Our kids love the idea of getting to know about SCIENCE. The 7th grade teachers I work with even use it with their kids in Science class. Try From Tadpole to Frog (Let's-Read-and-Find-Out Science 1). As I am adding product links I see that has over 600 titles in this series listed!

Although it was a bit long to hold attention (mostly the other adults in the room) the kids seemed to get a lot out of it, asking questions and remembering when they had been in a similar situation as the person in the throws of the problem. Kids and adults learned from it in our house.

I received the book on time and it is appropriate for my daughter who is three and very much into science and skeletons.

Kids 4 to 6 will find this an entertaining read with easy to follow illustrations all about why their bodies react the way they do!... informative for parents also, takes out the guesswork.
