Customer Reviews

I am 33 years old, and I received this as a gift from my aunt. As a kid, I enjoyed making my own paper airplanes, and trying to come up with variations to see how flight performance would be affected. I never imagined there being quite so many possibilities, though. It's been fun spending a few minutes each day to create a new paper airplane. There is a great amount of variety, and a wide range of complexity. Some have been fairly simple and similar to ones that I built as a kid, while others have far more complex folds. As an adult, I like this, as it makes many of the designs quite interesting, and slightly challenging (in a fun way). Young children would probably require assistance on some designs, but it would be fun to teach the child how to perform some of the more difficult steps. My son is only an infant right now, but I can imagine it being a lot of fun for a boy of 5 years or older. People who have experience with origami will have no problem with any of the designs. Pros: + Great variety + Fun designs and artwork + Clear instructions + Complexity (can be a

minus for some)Neutral:= I have not tried actually flying any of these airplanes, so I cannot comment on actual flight performance. My interest has been solely in the experience of folding and creating the planes.= Some planes require cutting with scissors, or using tape. Not really a minus, but as a fan of origami, I feel it takes away a bit from the purity of the art of paper folding. I understand that it allows for more possibilities with the designs.Cons:- Not truly one every day. Saturday and Sunday of each week are combined into a single paper airplane, thus providing 6 per week.
