Dinosaur ABC Coloring Book (Dover Coloring Books)

Synopsis

Here's a moderately priced coloring book that comes with an entertaining (as well as educational) twist! Illustrator Llyn Hunter has dramatically rendered " in alphabetical order " 28 prehistoric beasts as they might have appeared in their natural habitats millions of years ago. Extensive notes contain fascinating background information on the mighty Apatosaurus, the herbivorous Brachiosaurus, the "helmeted" Corythosaurus, and other Mesozoic creatures. Young amateur paleontologists are provided with a list of sources for further reading, plus helpful suggestions for coloring the drawings.

Book Information

Series: Dover Coloring Books

Paperback: 32 pages

Publisher: Dover Publications; Clr Csm edition (October 1, 1988)

Language: English

Age Range: 3 - 8 years

Grade Level: Preschool - 2

Customer Reviews

When I bought this coloring book I thought it would be a nice book for my kids to color in. But it is that and more! It has a really nice section that names all the dinosaurs in the book and tells a little bit about them so kids can learn about the dinosaurs they are coloring. Probably best for kids in the 6 and up age group but coloring is fun for everyone!

In fact, my only issue with Dover's coloring books is that they seem almost *too* nice to color at all. That said, we bought this for my two-year old daughter to color in. She's a big dinosaur fan - and we figured she might benefit from associating the letters (that hasn't panned out) with the dinosaurs.

She has, however, learned some new dinosaur names. There are, as one might guess, some pretty obscure ones in this book. As with our other Dover coloring books, this one is so functional as a reading book for a young child that it may be years before we ever get around to using it for its stated purpose. That said, you really get your money's worth with these books. They're fine for a stand alone read, and when the kids get older, they are perfect for creative coloring.

The pictures are clear, coloring book-style drawings that even your most sophisticated paleontologist will enjoy exploring. Even adults can learn about new dinosaurs that would make a great class project if each child took one letter of the alphabet and a display from A-Z was made. Happy coloring!

I found this one very good for working with the alphabet. My granddaughter is only 3 but knows all of her letters and found the many different dinosaur's interesting. We had to find simpler names for them, but that was ok, it still worked out well.

My almost five years old grand-daughter loves this book. She loves coloring each dinosaur and I try to teach her each dinosaurs. However, I am trying to get the book "Dot to Dot" dinosaur but I cannot get it from . We all plan to see the movie "Walking with Dinosaur" on coming Christmas Day. I would strongly recommend this book to any youngsters who loves learn about dinosaur. Thank you.

Excellent coloring book. One of my favorites for my 3-year old who is not yet into coloring. He still enjoys flipping through his coloring books to look at the dinosaur pictures! Worth the price!

BGT FOR NEIGHBORS BOYS. THEY ARE BOTH UNDER THE AGES OF 5 AND BOTH LOVED THE BOOKS.

My daughter is obsessed with dinosaurs and this coloring book is such a steal! I like that they have less popular dinosaurs so we are actually learning something. Perfect, educational buy!
