My Mommy's Toys

Synopsis

“Are you out of your mind?” With that exclamation did the author’s father greet her announcement that she and her husband were expecting their first child. And for good reason, because his daughter was disabled from birth and as a father of ten he knew from experience the many challenges children would bring. Thus began the author’s odyssey as a disabled mother raising two imaginative and rambunctious boys to adulthood. Along the way she learned that motherhood sometimes required inventive solutions and that children had their own definition for “assistive devices”. My Mommy’s Toys is a children’s coloring book written from the point of view of the oldest son in the author’s family. This book is unique because the “Mommy’s Toys” are crutches, a walker and a wheelchair. This story is filled with antics of the brothers using Mommy’s toys in their play and gives some insight into raising children when the mother has Cerebral Palsy.

This is a great story about how two little boys play with their mother’s “toys,” because she has Cerebral Palsy. The way that the children use the crutches, walker, and wheelchair is very clever. It also gives a good insight as to how the mother deals with raising her children, even though she has a disability, and how she never allows her disability to get in the way of being a mom. As a healthcare provider, this is the first book of it’s kind to show how a person with a disability raises her children. I would definately recommend this book.
