My First Book Of Uppercase Letters (Kumon Workbooks)

Synopsis

Kumon workbooks are based on the "Kumon Method", an educational philosophy that aims at unlocking the full learning potential of each individual child. The Kumon Method introduces learning concepts in an incremental, step-by-step approach, allowing children to master new skills easily and without anxiety or frustration. As a result, children gain confidence in their abilities and are motivated to learn on their own.

Customer Reviews

This past year we were homeschooling preschool. My son, who had turned 4 last summer, really disliked using pencils or crayons. We tried writing a few times, but I didn't think preschool was a time for tears. We compromised and instead of writing he did the first kumon book of cutting, play dough, finger paint and some coloring with pencils (the day on a calendar for math). Now that he turned 5 a few weeks ago, I told him that we really should do some writing. I got this book and amazingly, he is now interested and happy to do the pages! Granted, he finds them "easy" at age 5. This is not a problem, I think it is fine to do a few pages every day and quickly move on. I'm glad I followed the advice of other homeschool mothers and wait until he was ready to start and not worry that other 4 year olds in actual schools were writing their names. At this point he can read the instructions (with some help), and say "x" as he writes the letter X for example. And I'm glad he

smiles and feels a sense of accomplishment. The amount of practice available in the book is sufficient for now. Of course, we will follow with further practice later on. This book teaches the letters based on how easy they are for a small child to write. So they will write I, T, F and E before A, B or C. This approach doesn't bother me at all. But if you want to teach the alphabet in order, perhaps this is not the book you want. This book has the age range of 3-5 years old. I have a 3 year old too. And I know kids vary in maturity and so on. But at least my children did not appear mature enough at age 3 to follow these instructions consistently. You know what my 3 year old does? She writes all over the page.
