Customer Reviews

I disagree with the previous reviewers. This book contains cute parts geared toward kids, less of the adult humor that the movie contains that a child might miss, and small tidbits of tie-ins to the movie. In other words, it's just brought down even more to a kid's level with simple wording. And did you ever notice that animation movies never really cross over well to the world of short story books? People want Nemo manga, I guess, but how much of the original story can you present in a kid's book? Not much, or you lose their attention. I heart the illustrations because they are not your typical Disney- I cannot explain it..they are just different, as you can see on the above cover. It is just a simple story that definitely gets overshadowed by the movie in an adult's eyes, but to a kiddo, it's pure gold. Plot: Nemo has fun at school in various ways. The end.

This short story takes place after the adventures of the movie FINDING NEMO. Basically, it tells what happens to Nemo during a day in school. Other than that, there is no plot. The illustrations are

not the quality of stills and shots from the film, but are recognizable. This is a decent book for young children who have seen the movie and also makes a decent gift for any fan of the film.

I wrote the review for this book under the book title of a heart warming story about Nemo and his Daddy. But here goes again. You get a birds eye view into a day at school for Nemo and his friends. It will encourage your little fish kids and grand kids to share their school experiences with you.

The book itself is Awesome ! The shipping was terrible!! They should have put cardboard in between because the book came crease in half. I'd return it but for what I paid for it it's not worth it.

My son got this as a gift for his second birthday and he really likes it. The story is unexciting and I don't really enjoy reading it too much, but as I said my son like it. I think that if you have a Nemo fan on your hands, they will like this book. Just don't expect too much as far as the pictures and the story line go.

2 year old loves this book! It names most of the Nemo characters too, which is nice for parents who don't have the movie memorized or can't remember each character's name.

Got this for a girl who loves the movie Finding Nemo, and the description said it was a die cut book, and is just a regular rectangle. Not that she knew the difference.

Good sized book - perfect for little hands. The pictures inside are colorful and large. *This is not a 'hardback' or 'board book'. I would recommend this book
